HARSHIT JAIN

Phone: 7014744311

Email: harshit.j7196@gmail.com

Address: Alwar, 301001, RAJASTHAN (IN)

PROFESSIONAL SUMMARY

Software Developer having 7 years of experience in Industrial, Healthcare, Fintech products, now focused on production GenAI systems. Hands-on with Claude (Anthropic API and via AWS Bedrock) and OpenAI, end-to-end RAG pipelines, LLM evaluation and observability, guardrails, and containerised deployment.

SKILLS

Python, AI, GenAI, Bedrock, OpenAI, Claude, Cursor	*Experienced*
Postgres, MySQL, MongoDB, Redis	*Experienced*
HTML, CSS, JavaScript, React	*Skillful*
Embeddings, PG Vector Databases, RAG Architecture, LLM	*Experienced*
Jenkins, Apache, GIT, CI/CD, RabbitMQ, Kafka	*Experienced*
Langchain, FastAPI, Flask, Django	*Experienced*
AWS, GCP, DigitalOcean, Cloud Run, SQS, EC2, Lambada, Glue, IAM	*Skillful*
Airflow, Elastic, Docker, LightGBM,API Gateway, SNS	*Skillful*
Numpy, Pandas, MatplotLib, Plotly, PyTorch, BeautifulSoap, OpenCV	*Skillful*
PySpark, ETL, Odoo, Kubernetes, Postman	*Skillful*

EXPERIENCE

Oct. 2025 - Present

Sr. Python Developer, Freelance

- Built and shipped RAG-based assistants using Claude via the Anthropic API and AWS Bedrock, including tool use and structured JSON outputs.
- Designed retrieval pipelines end to end: document parsing, chunking with overlap tuning, embedding generation, hybrid retrieval and cross-encoder reranking before context assembly.
- Established evaluation harnesses with curated golden question sets, measuring retrieval recall, answer groundedness and hallucination

rate across prompt and model changes.
- RAG: document parsing, chunking strategies (semantic, recursive, parent-document), embeddings, hybrid search (BM25 + vector), cross-encoder reranking, pgvector / Pinecone / Azure AI Search
- Evaluation: RAGAS, DeepEval, golden datasets, groundedness & retrieval-hit-rate metrics, regression suites
- Provide clear, detailed descriptions of web site specifications such as product features, activities, software, communication protocols, programming languages, and operating systems software and hardware.

September. 2024 - September. 2025
Trivandrum, Kerala

Lead Python Developer, Innovation Incubator Advisory Pvt Ltd

- Build and maintain Odoo based modules & customising their functionality with custom code & manually added modules for telecom domain.
- Confer with management or development teams to prioritise needs, resolve conflicts, develop content criteria , or choose solutions for different apps available under Odoo.
- Working on different modules like CRM, Contact, Inventory etc.
- Evaluate code to ensure that it is valid ,is properly structured, meets industry standards and is compatible with browsers, devices or operating systems.
- Containerised services and deployed on Kubernetes with CI/CD pipelines and versioned prompt/config management.
- Working on setup for User management & Automation Rules.
- Working on ETL project related to Healthcare domain.

August. 2023 - August. 2024
Gurgaon, Haryana

SDE-II, Nutrabay

- Build architecture & maintaining web code & scripts to run system smoothly using django micro-services based architecture on Nutrabay dashboard.
- Confer with management or development teams to prioritise needs, resolve conflicts, develop content criteria, or choose solutions to sync up orders & checkout service.
- Maintaining scripts to sync up information with Vinculum & Clickpost.
- Working on Kafka & Kibana for scalability & fast system responses.
- Implementing Elastic Search for Nutrabay Dashboard data retrieval.
- Implementation of Juspay for better payment experience
- Introducing GoAffPro for affiliate marketing.

May. 2023 - August. 2023
Mumbai, Maharashtra

Sr Python Developer (Contract), Hexafold Technologies

- Build architecture & maintaining web code & scripts to run system smoothly using FastAPI, DBDiagram & docker.
- Confer with management or development teams to prioritise needs , resolve conflicts and develop content criteria or choose solutions.
- Develop databases that support web applications and web sites.
- Reviewing codes on GIT Lab and mentoring team mates and interns with their respective tasks.

- Team handling & client interaction for daily updates regarding code activities.

January. 2020 - May. 2023
Alwar, Rajasthan

Python Developer, Consolebit Technologies

- Build and maintain web sites using authoring or scripting languages, content creation tools, management tools using Django.
- Confer with management or development teams to prioritise needs, resolve conflicts, develop content criteria ,or choose solutions.
- Evaluate code to ensure that it is valid , is properly structured, meets industry standards and is compatible with browsers, devices or operating systems.
- Develop databases that support web applications and web sites.
- Working on multiple client side projects from scratch both in team and as individual.
- Deployment using Apapche and linux.
- Reviewing codes on GIT Lab and mentoring team mates and interns with their respective tasks.
- Managing day to day tasks for juniors & providing solutions to their problems during project handling.

EDUCATION

July. 2017

Bachelor of Technology:Electrical Engineering

- MITRC, Alwar, Rajasthan

PROJECTS

• **CN ChatBot**
Project Description : Making an Chatbot for customer support & general FAQs.
Tools & Technical Environment : Python, Fast API, OpenAI, LLM & Azure Files, VectorDB, Semantic Search, RAG, HuggingFace Transformer
Roles & Responsibilities :
Developing chatBot using predefined FAQs, data extraction from APIs and documents to generate meaningful answers.
Making ChatBot work using RAG & semantic search along with embedings & vectorDB formations to generate human like answers.
Built evaluation set of N question/answer pairs; tracked retrieval hit rate and answer faithfulness across releases

• **EyeScanner**
Project Description: Automated NIR iris image enhancement for biometric authentication.
Tools & Technical Environment: Python, OpenCV, NumPy, scikit-image, scikit-learn, Computer Vision, Biometric Image Processing, CLAHE, LBP/GLCM Feature Extraction
Roles & Responsibilities:
Built iris detection and enhancement pipeline
Implemented ML-based image comparison and quality metrics
Validated images for bio-metric SDK compatibility.

• **Sneh Herbal:**
Project Description : Herbal Products ecommerce website.
Tools & Technical Environment : Python, Django, Postgres, HTML, CSS
Roles & Responsibilities :
Ecommerce website creation using Django & HTML
Making CRUD operations for Product Listings & Details Pages.
Creating Invoicing dashboard along with Inventory operations.

• **NerdAgent**
Project Description : Making an AI Agent for marketplace using AWS Bedrock.
Tools & Technical Environment : Python, Fast API, GenAI, AWS Bedrock, IAM, LLM & S3, Docker
Roles & Responsibilities :
Creating & establishing integration of AI agent using AWS Bedrock.
Making APIs for CRUD operations for knowledge-base, data-source & invoking agent.

• **Pavlov Media**
Project Description : Pavlov's data migration using AWS tools & mappings from excel to csv using pyspark scripts.
Tools & Technical Environment : Python, Redshift, AWS Glue & Databrew.
Roles & Responsibilities :
Creating & establishing mappings for database tables from excel to redshift.
Transformations using databrew & ETL jobs .
Writing AWS Glue jobs for creating tables in redshift from databrew.

• **PRTC Telecom (Odoo)**
Project Description : Telecom based web application serving multiple category products odoo based architecture with usage of many third party tools.
Tools & Technical Environment : Odoo, Python, MySQL, AWS Lambada, Github.
Roles & Responsibilities :
Building & maintaining Odoo based applications like CRM , Contacts, Sales module.
Ingtegrating third party tools & services like Email service.
Writing APIs for storing data to external DB.
Bug fixes & writing scripts for data exports.

• **Nutrabay**
Project Description : Healthcare & fitness web and mobile application serving multiple category products with micro-service based architecture with usage of many third party tools.
Tools & Technical Environment : Python, Django, MySQL, Airflow, Kafka, Kibana, Jenkins, AWS SQS, Lambada, Redis, Elastic, BitBucket.
Roles & Responsibilities :
Building & maintaining database architecture for different micro services related to Order & payment journey.
Ingtegrating third party tools & services like Juspay, GoAffPro, SQS.
Writing APIs for Nutrabay dashboard to handle day to day operations.
Bug fixes on refund module & writing scripts for data exports.
Writing cron jobs in airflow & webhooks for third party services.

• **Nova**
Project Description : LPG/CNG supply management system for customers to enjoy app based UI in Ghana.
Tools & Technical Environment : Python, FastAPI . Postgres , Docker, GCP, GitHub.
Roles & Responsibilities :
Working on structural design & CRUD APIs.
Optimising database architecture including many micro-service based code.

Working on self reliant payment gateway & UPI service.
Mainting & designing swagger & documentation.

• **SupplyVue**
Project Description : Warehouse Management System for Industrial usage. (UK)
Tools & Technical Environment : Python, Flask , Cosmos DB, Elastic, BitBucket, GCP.
Roles & Responsibilities :
Writing CRUD APIs using flask & raw sql.
Working on Cosmos DB and Table service (Azure) makes it more efficient to run & manage things smoothly.
Managing & maintaining server side application.
Design efficiently working models & controller.

• **Mcvac Enviornmental**
Project Description : Warehouse and inventory management system with web dashboard & client app for fleet
management. (USA)
Tools & Technical Environment : Python, Django, Pandas, MPTT, Google Auth, Firebase, Cron job, Numpy.
Roles & Responsibilities :
Building & designing application from scratch including db architecture.
Handling tools and employee/labor data using different python scripts.
Integrating Google Auth & SimpleJWT for user authentication.
Writing API for PDF creation using WeasyPrint lib.
Generating reports using pandas & python for fleet management.

• **Equation Editor**
Project Description : Mathematical Editor for operations in database architecture & industrial use. (Netherlands)
Tools & Technical Environment : Python, Django . Postgres , Docker, Cron, Celery, Numpy, Pandas, ETL.
Roles & Responsibilities :
Buidling & designing database architecture form scratch.
Writing REST APIs to perform CRUD operations using django rest framework.
Making Dynamic and run time db table operations and creation.
Performing mathematical equations operation using MathML python object from XML.
Writing scripts to Import/export data through CSV/XML.

• **Kwiqtap**
Project Description : IOS application making visitor/tourist experience better. (USA)
Tools & Technical Environment : Python, Flask, MongoDB , Docker, Redis, WebSocket, PySpark.
Roles & Responsibilities :
Writing CRUD operations to implement WebSockets for real time tracking.
Setting up Redis for async tasks & activity.
Server setup for ASGI application.

• **Fyers IPO & MF**
Project Description : Stock market platform for IPO and Mutual Fund (Bangalore, In)
Tools & Technical Environment : Python, FastAPI . Postgres , Docker, Cron, Lambada, EC2, Plotly, PyTorch,
BeautifulSoap, ETL.
Roles & Responsibilities :
Making APIs for trading platform for IPO and Mutual Fund systems.
Core python based project using Fast API
Handling data from BSE/NSE APIs to update in db using cron jobs.
User friendly platform for traders and investors.

• **Codex**
Project Description : Shipping Logistic management (Australia)
Tools & Technical Environment : Flask , MySQL , Docker, GCP, Gitlab, Airflow, Elastic.
Roles & Responsibilities :
Writing APIs for logistic based architecture to monitoring shipping transportaion overseas.
Integrating google maps to track ships.
Maintaining & bug fixes for customer and admin portal

• **Open-Mind**
Project Description : Blog Site (USA)
Tools & Technical Environment : Python, Django . MySQL.
Roles & Responsibilities :
Integrated django templates using Jinja2 format.
Writing Class based views for operations & arch. design.
Deployment using apache server.

• **Erdos Engineering Website**
Project Description : Marketing Website (USA)
Tools & Technical Environment : Python, Django . Postgres
Roles & Responsibilities :
Writing functionality & Integrated HTML templates with Django
Performed architecture design and operations.
Bug fixes and enhancement for efficient working of site.

ACHIEVEMENTS

- EOY in Consolebit Tech. Pvt Ltd
  EOM in Consolebit Tech. Pvt Ltd
  Winner in Dance and Debate at college & school level
  Qualified GATE 2019
